Dry needling - Wikipedia
Dry needling, also known as trigger point dry needling and intramuscular stimulation, is a pseudoscientific technique used by various healthcare practitioners, including acupuncturists, physical therapists, physicians, and chiropractors, among others. Acupuncturists usually maintain that dry needling is adapted from acupuncture, but others consider dry needling as a variation of trigger ...

Dry needling - Physiopedia
Trigger-point dry needling is an invasive procedure where a fine needle or acupuncture
needle is inserted into the skin and muscle. It is aimed at myofascial trigger points (MTrP) which are hyperirritable spots in skeletal muscle that are associated with a hypersensitive palpable nodule in a taut band. Trigger point dry needling can be carried out at superficial or deep tissue level.

Das myofasziale Schmerzsyndrom (MSS) (weniger üblich Myogelose) ist ein Krankheitsbild, das durch Schmerzen im Bewegungsapparat gekennzeichnet ist, welche nicht von Gelenken, Periost,
Dry needling is an effective therapy for the treatment of pain associated with myofascial trigger point (mtrp). Dry needling is a controversial and unproven technique for treating myofascial pain. It involves the insertion of fine, (but usually) solid needles. To evaluate current evidence of the effectiveness of dry needling of myofascial trigger points (mtrps) associated with neck and shoulder pain. The application of trigger point dry needling is able to reduce the excitability of the central nervous system by reducing peripheral sensitization. Dry needling is a technique used by physiotherapists to release myofascial trigger points. Long, sterile, single use, fine filament needles (acupuncture needles) are widely accepted by clinicians and researchers as a primary source of pain. Dry needling refers to a procedure in which a fine needle is inserted into the skin and muscle at a site of myofascial pain. The needle may be moved in an at a site of myofascial pain. In this classic work, he examined the short and long-term effects of dry needling in the treatment of myofascial pain in 241 patients with 312 painful mtrp.
