This Time Is Different: Eight Centuries of Financial Folly

Sep 14, 2021 · The great financial historian, Charles Kindleberger, pointed out in the 1970s that over several centuries, history showed there was a financial crisis in every decade since his classic Manias, Panics and Crashes of 1978, such crises have indeed continued to erupt in their turn, in the 1980s, 1990s, 2000s, and again in 2010. What causes financial crashes? Can we avoid them? This book by a former MIT economics professor aims to answer these questions.

The Banquet of Consequences

Charles Hugh Smith. The banquet of consequences is being served, and risk-off crashes are, like revenge, best served cold. In every decade since his classic Manias, Panics and Crashes of 1978, such crises have continued to erupt in their turn, in the 1980s, 1990s, 2000s, and again in 2010. What causes financial crashes? Can we avoid them? This book by a former MIT economics professor aims to answer these questions.

Technological Change as a Driver of Newtonian Optics

Ruskin Bond. The Sun, the Moon, and the Stars is a collection of short stories that explore the themes of light and darkness, love and loss, and the human condition. Through the lens of science and nature, the stories convey the message that the world is both beautiful and fraught with challenges.

The Judo of the purse

The Economist. Charles Kindleberger observed what we often ignore: Humans tend to get euphoric. And that euphoria can lead to a financial crash.

Manias, Panics and Crashes

Charles Kindleberger (October 12, 1910 – July 7, 2003) was an American economic historian and author of over 30 books. His 1978 book Manias, Panics, and Crashes, which studies the psychology and causes of financial crises, was recognized in 2003 after the dot-com bubble burst and boom for his role in developing what would become known as the Kindleberger hypothesis.
